# aluminium

...exclusively aluminium

Since the early 1970s, we have specialised exclusively in the heat treatment of aluminium alloys.

We serve the leading names in aluminium components for aerospace, automotive and advanced engineering.

We have the people, the plant and the processes to consistently deliver the highest quality standards.

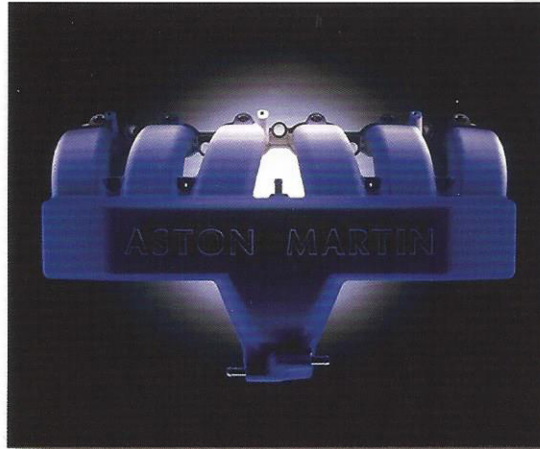

*"AHT are the best in the UK.  
No-one else can handle the  
volume that they can".*

*Mark Simpson  
Contech*

# heat

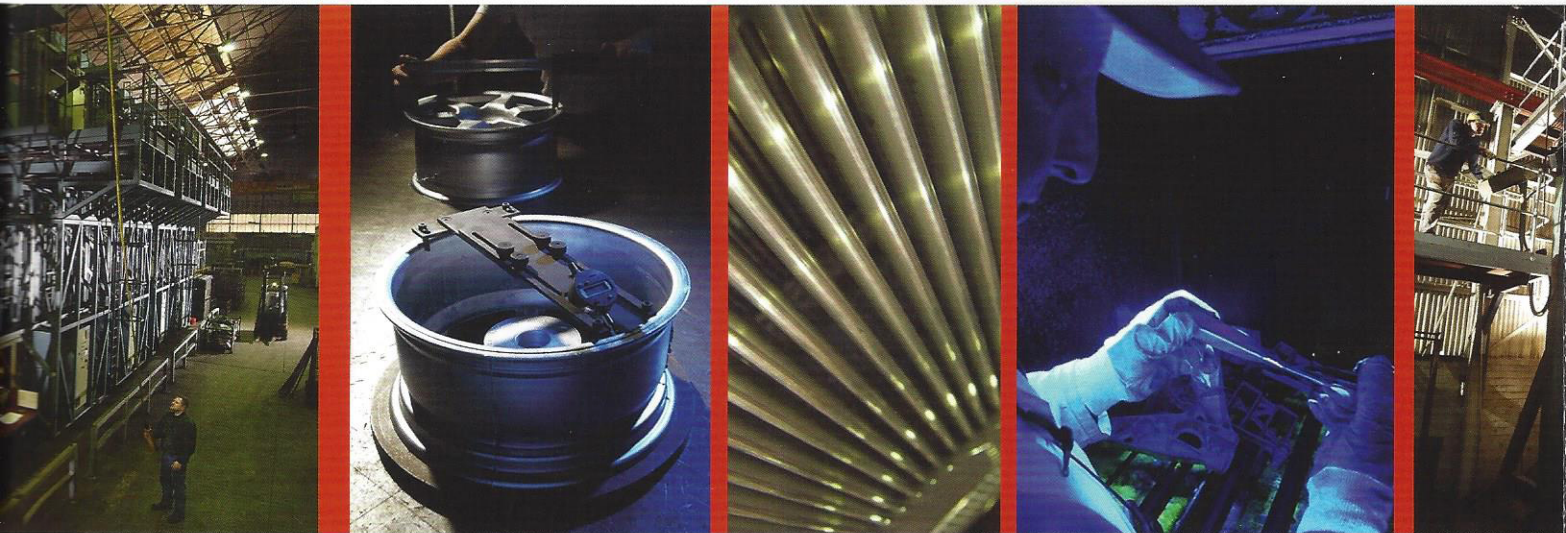

...unrivalled experience

We understand the technology of aluminium heat treatment.

From sheet metal to large sand castings, from a few kilograms to 2.5 tonnes, we have the capacity and the volume.

Our rapid quenching drop bottom ovens deliver precise processing, and our range of quenchants enable control over distortion and residual stress in all components.

*"We use AHT for all our high integrity components - they are a very professional company".*

...centre of excellence

We operate as a centre of excellence in aluminium, exceeding expectations.

We provide a total heat treatment service on one site – everything from dye-penetrant inspection to shot blasting and straightening.

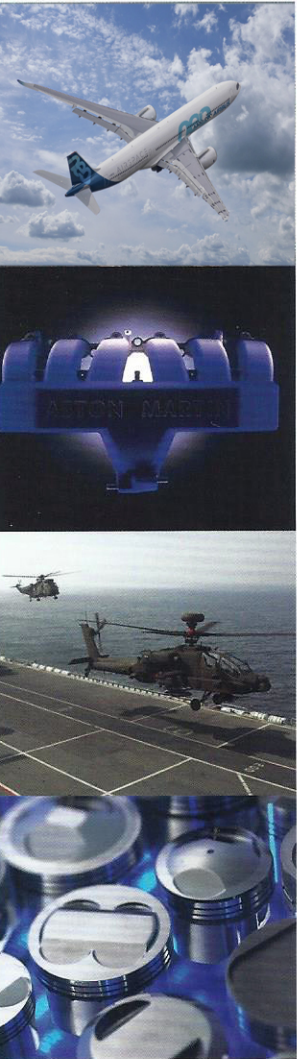

We work in partnership with our clients using leading-edge technology and depth of experience to deliver creative solutions.

*"We are very happy with AHT, from the word go they impressed us with their technical knowledge".*

specialise exclusively in  
aluminium.

We have unrivalled experience in  
aluminium heat treatment, providing  
a range of additional services from  
setting and shot blasting, to  
dye-penetrant inspection.

We work closely with our clients to  
overcome challenges and evolve  
solutions and we believe in  
excellence, integrity and  
commitment.

*"We have been using AHT for  
over thirty years - we know  
that we can rely on their  
expertise and advice".*

*Mike Cole  
Harrison Castings*
